

Organic Power 1

Composted organic fertilizer, for natural soil structure renewal, by increasing the organic matter. Made from 100% natural raw materials, special technology, processing materials thermally - composting. After treatment, the product remains loose, easy to distribute on field evenly.

Increased organic matter, normalized pH, fertilized plants with basic elements and microelements.

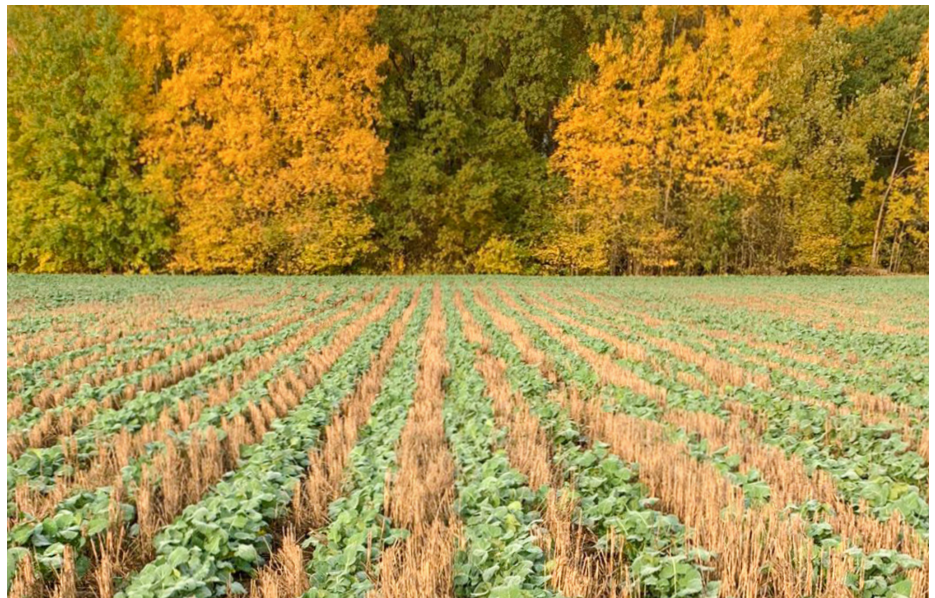

Contains the basic elements of NPK, as well as microelements: *Mg, Cu, Mo, S, Na, Fe, Zn, Si etc.*
The pH of the product is 8.3+

Product is registered in VAAD,
Registration no. G0.06-1871-19

Benefits of increasing organic matter in the soil:

- Soil remains more resistant to topsoil erosion;
- Increases the ability of the soil to self-regulate moisture;
- More efficient use of plant protection products.

N - 9.00 kg/t
P2O5 - 18 kg/t
K2O - 8 kg/t
Dry matter (DM) - 37%
Organic matter (OM) - 35%

For maximum efficiency, we deliver the product only in bulk.

Products available:

In Latvia - in Liepaja, Riga, Salacgriva.
In Estonia - Pärnu, Tartu, Kunda.

Globally, the products are exported to Germany, France, Poland, Latvia, Lithuania, Estonia.
